

2-DIN SMARTLINK INFOTAINER

An innovative multimedia system for many models of vehicle – the Z-N326 is a 2-DIN “Smartlink direct” infotainer with a **capacitive touch-sensitive 6.2”/15.7 cm TFT display**. The controls on the front of the unit have been deliberately reduced to give you completely intuitive control of the touch-sensor interface. The FAV sensor field on the left side of the device, and the ALT button in all menu pages may be assigned any function you choose – to give you direct access to your most important functions at any time.

The Z-N326 offers you modern mobile use of current Android or iOS based smartphones. The **“Smartlink direct” function** allows you to connect your smartphone directly to the Z-N326. The screen content of your mobile phone is then mirrored on the user interface of the ZENEC infotainer. Whereas apps using iOS have to be controlled via the iPhone, the “Smartlink direct” dual protocol with Android based smartphones enables direct app control of all functions from the touchscreen of the Z-N326, including use of the free sat nav apps* present on the smartphone.

However, the Z-N326 is also a modern entertainer: For media playback **two USB ports** with extension cables are provided to handle the latest audio and video formats. The high-sensitivity **FM RDS tuner** ensures outstanding radio reception under all conditions. For an optimum sound you have a **4 x 45 watt amplifier** and a **10-band graphic equalizer** with various sound presets.

The modern **Bluetooth unit** from Mediatek gives you a hands-free system that is completely stress free, simple management of contact favorites, and comfortable A2DP music streaming.

*If using smartphone sat nav apps is not enough, for a reasonable price you can retrofit the Z-N326 to become a **top naviceiver**: The microSD card Z-N326-SDFEU is an optional package, containing the latest ZENEC NextGen navigation software with map coverage of 47 European countries. The combination of the Z-N326 and the navigation software package is a co-developed function combo providing various advantages in practice, for example music playback with active route guidance or the continuation of route guidance after short refueling stopovers, etc.

A detailed list of the device specifications and functions can be found at www.zenec.com under ‘Specifications’.

Z-N326 FEATURE HIGHLIGHTS

2-DIN device with bi-color button illumination

The device design with red or white switchable sensor button illumination looks very modern when installed. The Z-N326 fits into any 2-DIN installation opening, and is a visual highlight with its chrome framed glass front panel.

Capacitive TFT LCD display

The capacitive 6.2"/15.7 cm touchscreen – with glass front for optimal freedom from glare – provides accurate control with just a light touch, and impresses with a high brightness level, rich contrast, and brilliant color rendering.

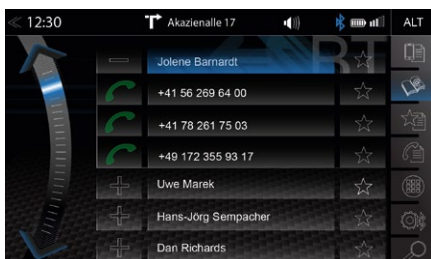

Optimal smartphone use thanks to Smartlink Direct

The SmartLink Direct app for Android-based smartphones/Apple iPhones mirrors the smartphone screen content on the screen of the Z-N326. In the case of Android smartphones the dual-protocol enables direct app control via the touchscreen of the Z-N326.

High-sensitivity FM tuner with DSP

The radio receiver of the Z-N326 has an FM RDS tuner with integrated DSP clear sound quality when FM stations are rather weak, thanks to adaptive noise reduction. The radio stations can be stored in 18 station memories.

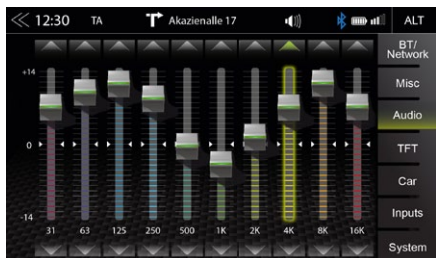

Bluetooth hands-free module with A2DP

Comfortable hands-free calling with phonebook instant search, easy to edit favorites menu, wireless music streaming via A2DP, and much more is offered by the Bluetooth section of the Z-N326.

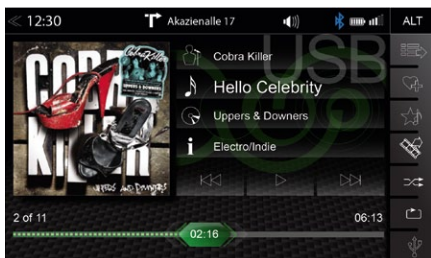

User-friendly: favorite and ALT button

The Z-N326 has a favorite button (FAV) on the left side of the device to which you can assign a function of your choice. There is also a configurable ALT button in the info bar. These two buttons give fast direct access to preferred functions.

Comprehensive EQ presets

With the 10-band graphic equalizer you can manually tune the sound exactly to the characteristics of your vehicle, or to your personal preferences. You can also select a predefined EQ profile to optimize the sound reproduction.

State of the art A/V file compatibility

The Z-N326 supports playback from all the media files widely used today: MP3, AAC (up to 24 bit/192 kHz), AAC (MP4A), M4A, WAV, OGM AVI, MP4, H.264, MKV 1080p, MPEG2/TS, MPG, and XVID.

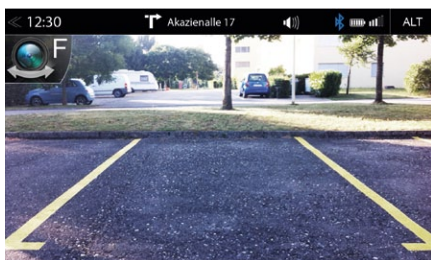

Connection to the steering wheel remote control

Using stalk/CAN interfaces available separately for almost all types of vehicle, the Z-N326 can be connected to practically any target vehicle. The audio and hands-free basic functions of the steering wheel remote control are normally fully integrated.

HDMI input

The HDMI input allows connection of multimedia devices and smartphones with HDMI output to the ZENEC Z-N326 for playback of audio and video content. In addition, it is possible to mirror images and audio via an optional Wifi display dongle to the device.

Rear-view camera interface

The Z-N326 allows the connection and control of two camera systems at the front and rear of the vehicle. With an auto function on engaging the reverse gear for maneuvering in and out of a parking space, the cameras can also be manually controlled via the touchscreen.

Easy sat-nav upgrade

With the 16 GB microSDHC navigation card Z-N326-SDFEU available separately, the Z-N326 can be turned into a well equipped navigation system for 47 European countries. Including 1 year map update subscription.

OPTIONAL NAVIGATION SOFTWARE BUNDLE FOR ZENEC Z-N326

Simply insert the optional available microSDHC nav card Z-N326-SDFEU (NextGen for Android, full EU) into the card slot of the Z-N326 to expand the infotainer into a comprehensive naviceiver.

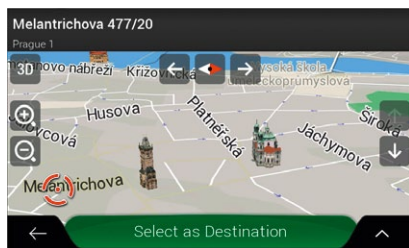

Z-N326-SDFEU KEY FEATURES

- microSDHC card (16 GB) based 3D navigation system with coverage of 47 EU countries*
- Premium POI bundle with more than 6 million destinations
- Realistic 3D rendering of terrains and landmarks, city centers, and road turns/exits
- 3D Auto-Zoom at crossings and roundabouts, lane assistance with display of highway traffic signs
- Tunnel-View
- TTS function (Text-to-Speech)
- 1 year map update subscription

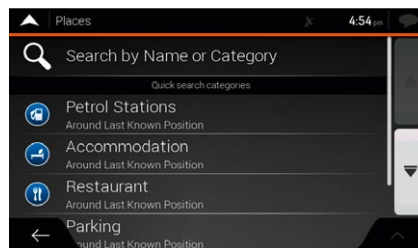

Z-N326-SDFEU SCOPE OF DELIVERY

- 1 x microSDHC card with navigation software in SD adapter
- 1 x navigation Quick-Start-Guide in the languages DE, EN, IT, FR, NL, CZ

* The navigation software is not part of the set content of the Z-N326 device.

High-resolution 3D maps

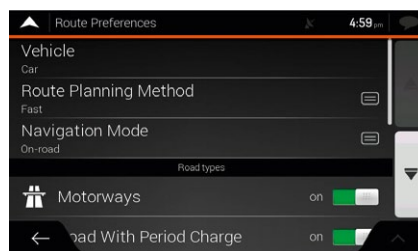

More than 6.5 million POI

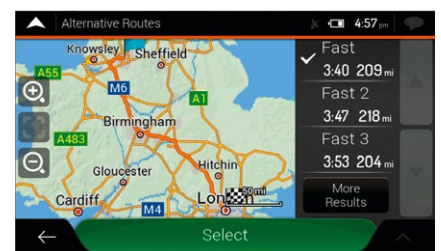

Fast and simple route calculation

Unequivocal route guidance

Various route planing options

Clear map display
