DEVICE USER MANUAL

EN

Device user manual for ZENEC media system

We are delighted that you have chosen a product from ZENEC.

The more familiar you make yourself with the functions of the ZENEC system the more confident you will be in operating it. Please read this operating manual before you start your new ZENEC system. In this device user manual you will find important instructions and information for the safe operation of the ZENEC system, and to help you make the most of its technical advantages.

For more information please visit the official homepage, or contact an authorized ZENEC dealer (zenec.com - dealers).

ZENEC wishes you a good and safe journey!

About this manual

This device user manual gives a description of all the equipment or model variants of the ZENEC systems. In addition, optional equipment or features of the vehicle are described that may not be included as standard in your vehicle. These are not identified for each and every individual case. Therefore equipment or features will be described that may not be in your ZENEC system or vehicle. More information can be obtained from your authorized ZENEC dealer.

All the information in this manual corresponds to the state at the time of going to press, and applies only to ZENEC systems in original condition. On account of possible updates to device software, the illustrations and features shown in this operating manual may be different from your ZENEC system. Differences in the information, illustrations or features cannot form a basis for any claims.

If you sell your vehicle with the ZENEC system still fitted, please ensure that this operating manual stays with the vehicle, and that any personal data like a phonebook stored in the device is deleted.

Resetting:
Settings → Device Configuration → Help → Factory Setting

BEFORE FIRST USE
  ✓ The safety instructions of the vehicle manufacturer, and the instructions given in this operating manual are all generally applicable.
  ✓ Please pay attention to the safety instructions on the ZENEC system.
  ✓ Before starting your journey make yourself familiar with the operation of the ZENEC system.
  ✓ Please use only suitable media for audio modes.
  ✓ If the ZENEC system has been disconnected from the power supply before use, it will be necessary to carry out a Sat-Fix before using the navigation system.

Sat-Fix:
Special User Manual → Navigation

SAFETY INSTRUCTIONS

> ⚠ **CAUTION**
>
> If the driver of the vehicle is distracted, this may lead to an accident or injury. Operating the ZENEC system can distract attention from the general traffic situation! Equally, connecting, changing or inserting data media can distract the driver from the general traffic situation.

> ⚠ **CAUTION**
>
> Devices, like mobile phones or removable storage devices, that are not fixed or are inadequately secured can be thrown through the interior of the vehicle by a sudden driving maneuver or an accident, thereby causing injury to vehicle occupants.

> ⚠ **CAUTION**
>
> When the housing of a CD/DVD player is opened injuries may be caused by invisible laser radiation.
>
> Modifications of the ZENEC system may only be carried out by specialists authorized by ZENEC!

> ⚠ **CAUTION**
>
> Always choose loudspeaker settings such that acoustic signals coming from outside can always be heard in the vehicle (e.g. signal horns or sirens).

> ⚠ **CAUTION**
>
> Incorrect installation or commissioning of the ZENEC system may cause damage to the ZENEC system or to the vehicle electronics. Only let qualified specialists authorized by ZENEC install the device.

> ⚠ **CAUTION**
>
> This ZENEC system is intended solely for operation at an on-board voltage of 12 V DC. Operating the ZENEC system at any other voltage can cause damage to the ZENEC system or to the vehicle electrical system.

> ⚠ **CAUTION**
>
> Taking apart or modifying the ZENEC system can result in damage to the device or the vehicle. Opening the device or modification by a person not authorized by ZENEC will render warranty claims null and void.
>
> In the event of a malfunction or defect please contact an authorized ZENEC dealer. Unauthorized repairs will render warranty claims null and void.

> ⚠ **CAUTION**
>
> A volume level that is set too high can damage the hearing. This is also true when the volume level is very high just for a short time.
>
> Changing or connecting an audio source can lead to sudden fluctuations in the volume level.

> ⚠ **CAUTION**
>
> The connection and charging leads of external mobile devices can get in the way of the driver. Please run these so that the driver's freedom of movement is not hindered.

> ⚠ **CAUTION**
>
> Route recommendations and displayed traffic signs on the ZENEC system may differ from the real situation. Traffic signs and traffic regulations have precedence over route recommendations and indications of the ZENEC systems.
>
> Speed data displayed in the navigation system corresponds to the permitted speed limit. Please adjust your speed and driving behavior to the prevailing visibility, weather, road, and traffic conditions.

CONTENTS

> ### ℹ️ NOTE
> *Please pay attention to the Device Quick Start Guide to learn more about the vehicle integration.

> Inactive icons that are grayed out cannot be selected.

Global controls

This list describes global controls and their functions that you will find in different sources of the ZENEC system. The function will always be the same: only the displayed content changes, depending on the source.

Function	Icon	Operation
List		Touch to display a list in the form of text
Tile		Touch to display a list in the form of tiles (images)
Search		Touch to start a search
Back		Touch to go back one level

In each of the sources you have the option to make selections using a search function 🔍 . On this page we show you how to use the search mask.

Function	Icon	Operation
Security	👁	Touch to show or hide the input on the display
Select	✓	Touch to display the current selection (the number of hits will be shown in brackets)
Delete	⌫	Touch to delete one character Hold down to delete the complete input
Back	↩	Touch to end the search or input
Upper/Lower	⇧	Touch to write a character in upper or lower case Double touch to write all the following characters in upper or lower case.
Keypad	🌐	Touch to change the keypad layouts QWERTY Keypad assignments like PC keyboard with Y QWERTZ Keypad assignments like PC keyboard with Z ABC Alphabetic keypad assignments GREEK Geek keypad assignments HEBREW Hebrew keypad assignments CYRILLIC Cyrillic keypad assignments

> ℹ **NOTE**
>
> The functions **Security** and **Upper/Lower** are only enabled in the password function.

ABOUT THIS CHAPTER

This chapter describes how to operate and use the audio and video sources. In addition, optional equipment or features of the vehicle are described that may not be included as standard in your vehicle. These are not identified for each and every individual case. Therefore equipment or features will be described that may not be in your ZENEC system or vehicle. More information can be obtained from your authorized ZENEC dealer.

SAFETY INSTRUCTIONS

> ⚠ **CAUTION**
>
> Only operate the audio playback or radio while driving when the traffic situation allows.

> ⚠ **CAUTION**
>
> If the driver of the vehicle is distracted, this may lead to an accident or injury. Operating the ZENEC system can distract attention from the general traffic situation! Equally, connecting, changing or inserting data media can distract the driver from the general traffic situation.

> ⚠ **CAUTION**
>
> Always choose loudspeaker settings such that acoustic signals coming from outside can always be heard in the vehicle (e.g. signal horns or sirens).

> ⚠ **CAUTION**
>
> According to the law, the operation of the video playback while driving is not permitted. For this reason, the picture switches off as soon as the vehicle moves.

> ⚠ **CAUTION**
>
> Changing or connecting an audio source can lead to sudden fluctuations in the volume level. This should be borne in mind before changing or connecting an audio source.

> ⚠ **CAUTION**
>
> The connection and charging leads of external mobile devices can get in the way of the driver. Please run these so that the driver's freedom of movement is not hindered.

> ⚠ **CAUTION**
>
> A volume level that is set too high can damage the hearing. This is also true when the volume level is very high just for a short time.

> ℹ **NOTE**
>
> A compatibility overview of useful devices together with memory sizes and formats can be found at www.zenec.com.

BEFORE FIRST USE

✓ The safety instructions of the vehicle manufacturer, and the instructions given in this operating manual are all generally applicable.
✓ Please pay attention to the safety instructions on the ZENEC system.
✓ For the reception of digital radio stations a suitable antenna system must be installed in the vehicle. If you have questions please contact your authorized ZENEC dealer.

RADIO

Overview

Fig. 2/02

Radio bands

The ZENEC system enables you to receive radio stations via FM, AM or DAB+. The reception of the individual radio bands is dependent on the position of the antenna in your vehicle. Thus not all vehicles from the factory come with antennas designed for digital radio reception. If your vehicle antenna is not DAB capable, contact your ZENEC dealer for a retrofit.

Icon	Function	
FM	Reception of analog radio stations using FM Entertainment → Radio → FM	S. 15
AM	Reception of analog radio stations using AM Entertainment → Radio → AM	S. 18
DAB+	Reception of digital radio stations using digital audio broadcasting Entertainment → Radio → DAB+	S. 20

Middle

Function	Icon	Operation
Cover		If a cover is stored on the music media, or via Gracenote, it can be displayed. This function is not supported for CD/DVD and BT Audio playback.
Artist		Information about the artist Touch to search for artists is only possible with Gracenote enabled.
Track		Information about the track Touch to search for tracks is only possible with Gracenote enabled.
Album		Information about the album Touch to search for albums is only possible with Gracenote enabled.
Genre		Information about the genre (only possible with Gracenote enabled)
Shuffle		Touch to turn on the random play feature within the folder that is playing
Repeat		Touch to automatically repeat a track
Jump		Touch or slide to skip within a track

DVD Audio

If a CD or DVD with music files is inserted into the ZENEC system, you can play back using this music source. The requirements of CD or DVD ROMs, and file formats can be found at www.zenec.com for a particular product under device compatibility.

Function	Icon	Operation
Source		Touch to go to the available sources
Back		Touch to skip back to the previous track Hold down to skip backwards
		Swipe to the right to skip back to the previous track
		Device Quick Start Guide → Multifunction Steering Wheel (only if supported by vehicle and ZENEC system)
Play		Touch to play a track
Pause		Touch to pause a track
Forward		Touch to skip forward to the next track Hold down to skip forwards
		Swipe to the left to skip forwards to the next track
		Device Quick Start Guide → Multifunction Steering Wheel (only if supported by vehicle and ZENEC system)
Playlist		Touch to display the folder list Entertainment → Media Audio → Playlist S. 31
Skip		Touch or slide to skip within a track
Shuffle		Touch for random play
Repeat		Touch to automatically repeat a track

Hard disk

If a USB stick or SD card with music files is plugged into the ZENEC system, you can play back using this music source. The requirements of USB, SD cards, and file formats can be found at www.zenec.com for a particular product under device compatibility.

Function	Icon	Operation
Source		Touch to go to the available sources
MLT		Touch to generate a playlist Entertainment → Media Audio → Gracenote S. 32
Back		Touch to skip back to the previous track Hold down to skip backwards
		Swipe to the right to skip back to the previous track
		Device Quick Start Guide → Multifunction Steering Wheel (only if supported by vehicle and ZENEC system)
Play		Touch to play a track
Pause		Touch to pause a track
Forward		Touch to skip forward to the next track Hold down to skip forwards
		Swipe to the left to skip forwards to the next track
		Device Quick Start Guide → Multifunction Steering Wheel (only if supported by vehicle and ZENEC system)
Mood		Touch to go to Gracenote mood selection Entertainment → Media Audio → Gracenote S. 32
Playlist		Touch to display the folder list Entertainment → Media Audio → Playlist S. 31
Skip		Touch to skip direct to the desired position Slide to reach the desired position
Shuffle		Touch for random play
Repeat		Touch to automatically repeat a track

BT Music (A2DP)

If a compatible mobile device is paired via Bluetooth®, you can play back using this music source. The requirements of mobile end devices can be found at www.zenec.com for a particular product under device compatibility.

Function	Icon	Operation
Source		Touch to go to the available sources
Back		Touch to skip back to the previous track Hold down to skip backwards
		Device Quick Start Guide → Multifunction Steering Wheel (only if supported by vehicle and ZENEC system)
Play		Touch to play a track
Pause		Touch to pause a track
Forward		Touch to skip forward to the next track Hold down to skip forwards
		Device Quick Start Guide → Multifunction Steering Wheel (only if supported by vehicle and ZENEC system)
Device		Touch to change between the connected mobile devices*
Shuffle		Touch for random play
Repeat		Touch to automatically repeat a track

ℹ️ **NOTE**
*The changeover applies only for music playback, and has no effect on the hands-free system.

ℹ️ **NOTE**
The listed functions depend on the paired mobile phone, installed software versions and the degree of compatibility.

iPod

If a compatible Apple device is connected, you can play back using this music source. The supported Apple devices can be found at www.zenec.com for a particular product under device compatibility.

Function	Icon	Operation
Source		Touch to go to the available sources
Back		Touch to skip back to the previous track Hold down to skip backwards
		Swipe to the right to skip back to the previous track
		Device Quick Start Guide → Multifunction Steering Wheel (only if supported by vehicle and ZENEC system)
Play		Touch to play a track
Pause		Touch to pause a track
Forward		Touch to skip forward to the next track Hold down to skip forwards
		Swipe to the left to skip forwards to the next track
		Device Quick Start Guide → Multifunction Steering Wheel (only if supported by vehicle and ZENEC system)
Playlist		Touch to display the folder list Entertainment → Media Audio → Playlist S. 31
Skip		Touch to skip direct to the desired position Slide to reach the desired position
Shuffle		Touch for random play
Repeat		Touch to automatically repeat a track

Playlists

There are various playlists. In general we distinguish between the standard and the Gracenote playlists.

Function	Icon	Operation
Folder		Touch to go to the next higher level
Folder		Touch to go to the highest folder level Hold to go to the hard disk overview (root)
Playlist		Listing of iPod device playlists (only available with iPod playback)
Song		Listing by song
Artist		Listing by artist
Album		Listing by album
Genre		Listing by genre
Mood		Sorting by mood
Podcast		Listing of iPod podcast directory (only available with iPod playback)
Scroll		Scroll through the list: Touch and hold to move the slider up or down Tap and hold your finger on the list to move the list up or down.

Further functions in tile view (only possible with artist and album for Gracenote)

Function	Icon	Operation
Tile		Touch the desired cover to make a selection
		Touch to play the selection (only for album)
		Touch to cancel the selection (only for album)

GRACENOTE

The Gracenote functions can be used for playback via USB or SD card. When a music source is connected, Gracenote synchronizes with the source. This process can take some minutes, depending on the size of the music source connected. An update for the Gracenote database can be downloaded from www.zenec.com → Support → Software-updates under the particular ZENEC system.

Function	Icon	Operation
MLT		This function generates a playlist based on the song currently playing Audio → Gracenote → Playlist S. 33

MLT Playlist

Fig. 2/14

This function gives you the option of managing playlists created by the MLT feature. After being saved the MLT playlist will be filled with the names of the artists.

Function	Icon	Operation
Folder		Touch to go to the next higher level
Temporary		By pressing a temporary playlist is created*
Save		Touch the temporary MLT playlist to save it
Delete		Hold down to delete an MLT playlist
		Hold down to delete an MLT playlist song
Scroll		Scroll through the list: Touch and hold to move the slider up or down Tap and hold your finger on the list to move the list up or down

ℹ **NOTE**

*This list will be deleted as soon as the ZENEC system is switched off. To retain this playlist permanently, it must be saved.

ℹ **NOTE**

The deletion of playlists and songs is only possible in the saved MLT playlists. Folders, songs and directories that already exist, or temporary MLT playlists cannot be edited.

Mood

Fig. 2/15

This function gives you the option of playing music from your collection according to your actual mood. Gracenote sorts your music collection into 25 different main categories, each with 4 subcategories, along four main axes (Positive, Dark, Calm, Energetic). In this way you have the choice of categorizing your music playback between 100 different mood styles.

Function	Icon	Operation
Tile		The total number of tracks which match to this mood are displayed inside the tile. Touch one of the main tile to open the sub-categories. Touch one of the sub-categories to start the playback of the playlist.
Mood art	Peaceful	Beside colour-coded classification, the Mood art shows the mood for a Mood Playlist.
Mood title	(53)	Mood title shows the total number of tracks for the chosen mood.

A/V-IN

This combined audio/video input can be used to connect a wide range of external devices. For example, you can use the ZENEC system to listen music via the AUX connection.

> ℹ **NOTE**
>
> This source is a purely passive input: control of the end device from the ZENEC system is not possible.

SMARTLINK

Via the Smartlink connection it is possible to connect mobile phones and multimedia devices to the ZENEC system using a special ZENEC accessory, and control them. In combination with HDMI, Miracast Smartlink interfaces, or a DVB-T tuner separately available from ZENEC, compatible end devices can be connected and controlled.

> ℹ **NOTE**
>
> Further information may be obtained at www.zenec.com, or from an authorized ZENEC dealer.

> ℹ **NOTE**
>
> For further information about the control and operation of compatible end devices, please refer to the relevant user manual for the end device included separately.

Camera

Fig. 2/20

This combined audio/video input can be used to connect a camera, optionally also with sound. If your ZENEC system has a CAM or ALT button, the connected camera can be switched on directly from these buttons.

Function	Icon	Operation
Settings	🔧	Touch to adjust the lines
Presentation	Marker ☑	Touch to show or hide the lines
Line fields	Linie 1	Display the line fields (1 – 3) with the arrows ◁ ▷ to change levels.
Back	↩	Touch to exit the settings menu
Together	▶◀	Touch to narrow the current field
Apart	◀▶	Touch to widen the current field
Up	▼	Touch to bring the current field nearer
Down	▲	Touch to push the current field away
Basic setting	🖳	Touch to set the lines to the basic setting

> ℹ **NOTE**
>
> To carry out calibration of the assist lines, reverse parallel to the parking space stripes and centrally to the start of the parking space (see fig. 2/20).

REAR SEAT ENTERTAINMENT

CONTENTS OF THIS CHAPTER

Fig. 2/21

M-Zone sources

If rear seat monitors are connected to the ZENEC system, they can be controlled using the sources locally available, independently of the ZENEC system.

Function	Icon	Operation	
CD/DVD		Touch to access the DVD playback Entertainment → M-Zone → DVD	S. 48
A/V-IN		Touch to access the external audio/video Entertainment → M-Zone → A/V-IN	S. 48
Front Audio		Touch to access the front audio playback Entertainment → M-Zone → Front Audio	S. 48
Smartlink		Touch to access the SMARTLINK control Entertainment → M-Zone → SMARTLINK	S. 48
M-Zone Off		Touch to switch off the M-Zone	

ℹ️ **NOTE**

The A/V-IN and Smartlink sources can only be used synchronously in the M-Zone and the ZENEC system.

DVD

If additional monitors for the rear seat are connected to the ZENEC system, DVD playback independent of the actual playback on the rear monitors is possible using this function.

A/V-IN

If additional monitors for the rear seat are connected to the ZENEC system, this combined audio/video input can be used to connect a wide range of external devices, and played independently of the actual playback at the rear.

> ### ⓘ NOTE
> Control is solely via the connected end device.

Front Audio

With this function the actual audio playback at the rear can be played.

SMARTLINK

Via the Smartlink connection it is possible to connect mobile phones and multimedia devices to the ZENEC system using a special ZENEC accessory, and control them. In combination with HDMI, and Miracast Smartlink interfaces, separately available from ZENEC, compatible end devices can be connected and controlled.

> ### ⓘ NOTE
> Further information may be obtained at www.zenec.com, or from an authorized ZENEC dealer.

> ### ⓘ NOTE
> For further information about the control and operation, please refer to the user manual that is included with the Smartlink interfaces.

HANDS-FREE SYSTEM

ABOUT THIS CHAPTER

This chapter describes how to operate and use the hands-free system. In addition, all the equipment variants and functions of the ZENEC system are described, as well as optional equipment of the vehicle manufacturer that may not be included as standard in your vehicle. This section does not refer separately to such issues. Differences from this information, features or functions cannot be used for any claims.

SAFETY INSTRUCTIONS

> ### ⚠ CAUTION
> If the driver is distracted, this may cause an accident or injury.
> Operating the ZENEC system can distract attention from the general traffic situation! Equally, connecting, changing or inserting data media can distract the driver.

> ### ⚠ CAUTION
> Using the mobile phone with the hand while driving is not permitted. Only enter data or make changes via the ZENEC system when the traffic situation allows.

> ### ⚠ CAUTION
> While driving always stow your mobile phone so that it cannot be thrown through the vehicle if there is a sudden driving maneuver or an accident.

> ### ⚠ CAUTION
> Network coverage depends on a number of factors – such as the network provider, or the geographical position of the vehicle. Tunnels, underpasses, parking garages, or street canyons in cities may lead to interruption of the connection. Thermal glazing or metallic stickers on the windows of the vehicle may also disrupt the connection.

> ### ⓘ NOTE
> It is only possible to use the functions in this chapter with a paired mobile phone enabled by the ZENEC system. A compatibility list of pairable mobile phones can be found at www.zenec.com.

> ### ⓘ NOTE
> Making phone calls and using mobile communication products both at home and abroad may lead to high costs, depending on the network provider and the contract. This is not indicated by the ZENEC system. No claims against ZENEC can be based on these factors.

BEFORE USING FOR THE FIRST TIME

✓ Always follow all the safety instructions of the vehicle manufacturer, and the instructions given in this user manual.
✓ Please pay attention to the safety instructions on the ZENEC system.
✓ Pairing and synchronizing a suitable mobile phone with the ZENEC system

Compatibility→ www.zenec.com

CONTENTS OF THIS CHAPTER

Fig. 3/01

SCREEN

Fig. 3/02

This view will familiarize you with the most important icons and functions. If no mobile phone is found by the hands-free system, or if no mobile phone is paired, you will be automatically directed to the device manager.

Header

Icon	Meaning
	Mobile phone currently connected
TEXT	Name of the current network provider (appears only if there is a call in progress)
	Battery capacity of the mobile phone currently connected
	Signal strength of the mobile network currently connected
R	Appears if roaming is charged by the network provider (for example abroad)

Footer

Function	Icon	Operation
Select Mobile phone		Touch to change the connected mobile phone. A maximum of three mobile phones can be paired, of which two are connected, and one is active. Settings → BT Configuration → Device Manager S. 70
Numeric pad		Touch to enable the numeric pad Hands-free System → Control Panel → Numeric Pad S. 53
Phonebook		Touch to access the phonebook of the currently paired mobile phone Hands-free System → Phonebook S. 55
Favorites		Touch to access the stored favorites Hands-free System → Favorites S. 56
Call logs		Touch to access the call logs Hands-free System → Call Logs S. 57
Call		Touch to pass the call from the hands-free system to the mobile phone or vice versa
Numeric pad		Touch to show the numeric pad Necessary in case asked to enter a further number during the call (telephone call center etc.)
Back		Touch to go back to the previous level

> ⓘ **NOTE**
> To be able to use the phonebook or call lists without any problems, make sure that during the pairing process you confirm data access enable to the mobile phone. It is recommended to permanently confirm this on your mobile phone.

CONNECTION

Accepting/ending incoming calls

Via the ZENEC system

Function	Icon	Operation
Accept		Touch the green handset to accept the call
Reject		Touch the red handset to reject the incoming call
End		Touch the red handset to end the call

About the multifunction steering wheel

Function	Icon	Operation
Accept		Device Quick Start Guide → Multifunction Steering Wheel (only if supported by vehicle and ZENEC system)
End		Device Quick Start Guide → Multifunction Steering Wheel (only if supported by vehicle and ZENEC system)

Call setup using numeric pad

In the footer touch the [icon] numeric pad.

Key in the desired phone number in full using the numeric pad. To set up the connection, touch [icon]. The display now changes to the call connection view.

Function	Icon	Operation
Numeric pad		Input field for entering numbers
Special characters		Touch to enter a Star Hold down to enter a Plus
Special characters		Touch to enter a hash symbol
Correction		Touch to delete the last digit Repeated touching to delete more digits Continue to hold down to delete the entire line entry
Call setup using phonebook

In the footer touch the 📇 phonebook.

From the phonebook list select a call partner and set up a connection by touching 📞 .

After touching a contact you will be directed to the contact details view.
Hands-free System → Phonebook → Contacts

> **ⓘ NOTE**
>
> Depending on the mobile phone and phonebook entries, the first synchronization can take up to 35 min.

Conference call

A conference call enables you to accept a second call partner. This give the possibility of talking to the first or the second partner, during which time the other partner is muted.

The simultaneous hook-up of all partners is not possible.

> **ⓘ NOTE**
>
> This function depends on the network provider and the mobile phone setting!

Function	Icon	Operation
Join	📞	Touch to let an incoming partner join*
Change	📞	If more than one call partner is connected, you can change between the two partners by repeated touching.

> **ⓘ NOTE**
>
> *This icon appears only when a further external partner calls your mobile phone.

PHONEBOOK
Contacts

Fig. 3/03

After successful synchronization of the mobile phone with the hands-free system, you will have access to the phonebook and the call logs.

Function	Icon	Operation
Search	🔍	Touch to open the search window
Slider	Ⓒ	Touch and hold, move up or down to search in the phonebook; the current letter of the alphabet will be indicated in the slider.
Contacts	📇	Touch to go to the contact list. Up to 1000 contacts per paired mobile phone can be synchronized; it makes no difference whether the contacts are stored in the phonebook or on the SIM card.
Contact Type		📱 Entry for mobile phone number
		🏠 Entry for private number
		📞 Entry for business number
		❓ Entry not identified
Call / Accept	📞	Touch the green handset to setup the call

Favorites

Fig. 3/04

Here you have the facility to store and retrieve up to 8 phone numbers as favorites. You can select any of the phone numbers in the phonebook and save them as favorites; exceptions are are emails and addresses.

> **ⓘ NOTE**
> All favorites are visible to every user as they are saved on the device.

Function	Icon	Operation
Stored Favorite	Name / Number	Touch to set up a connection with a stored favorite
Free Favorite		① Touch to add a new favorite
		② Select desired number from phonebook and confirm with ⭐
Delete		① Touch to remove a favorite
		② Touch the favorite you want to delete

> **ⓘ NOTE**
> A change of data on the mobile phone will not automatically be applied in the Favorites. Should you want to change data such as phone numbers then you must also transfer it to the Favorites.

Call lists

Fig. 3/05

If a compatible mobile phone is coupled, the call lists from the mobile phone will be synchronized with the hands-free system (this process can take some minutes, depending on the number of contacts). Once synchronization has been successfully completed you will be able to access:

Function	Icon	Operation
All		Touch to see all calls
Missed		Touch to see the missed calls only

Function	Icon	Operation
Incoming	⏭	Entries with this icon refer to incoming calls
Contacted	⏮	Entries with this icon refer to outgoing calls
Missed	✕	Entries with this icon refer to calls that you did not take

NAVIGATION

ABOUT THIS CHAPTER

This chapter describes how to operate and use the navigation function. This is only a quick guide; full details can be found in the Navigation User manual, available separately.

SAFETY INSTRUCTIONS

> ⚠ **CAUTION**
>
> If the driver is distracted, this may cause an accident or injury. Operating the ZENEC system can distract attention from the general traffic situation! Equally, connecting, changing or inserting data media can distract the driver.

> ⓘ **NOTE**
>
> Map updates can be carried out by visiting https://zenec.naviextras.com/shop/portal.

> ⚠ **CAUTION**
>
> Route recommendations and displayed traffic signs of the navigation system may differ from the real situation. Traffic signs and traffic regulations have precedence over route recommendations and indications of the ZENEC systems.

> ⚠ **CAUTION**
>
> Speed data displayed in the navigation system corresponds to the permitted speed limit. Please adjust your speed and driving behavior to the prevailing visibility, weather, road, and traffic conditions.

BEFORE USING FOR THE FIRST TIME

- ✓ Always follow all the safety instructions of the vehicle manufacturer, and the instructions given in this user manual.
- ✓ Please pay attention to the safety instructions on the ZENEC system.
- ✓ SD card with appropriate map material must be inserted.
- ✓ Commissioning of navigation system completed (Sat-Fix, etc.)

  Device Installation Manual → Commissioning (www.zenec.com)

CONTENTS OF THIS CHAPTER

Fig. 4/01

Overview

> ⓘ **NOTE**
>
> This user manual explains only the most important functions of the navigation system. Full details of the navigation functions can be found in the Navigation User manual, available separately.

Overview

Fig. 4/02

Function	Icon	Operation
Map		Touch to go to the map view
New Route		Touch to go to the destination input
Traffic		Touch to go to the traffic report summary

Map

Fig. 4/03

In the map view you are given diverse information depending on the navigation status. Here we explain only the basic functions that are available to you, including those when the route guidance is disabled. To see a detailed explanation of all map functions there is a separate user manual on navigation.

Function	Icon	Operation
Traffic report		Touch to see the traffic report summary
Compass	N	Touch to go to the geo data view. View of map orientation (direction of travel/North)
List		Touch to go to the control menu
Position		Current position of vehicle on the map

ℹ **NOTE**
For a full description see the Navigation User Manual included separately.

New Route

In this view we explain an input option for navigating to a destination. All the options and functions are given in more detail in the Navigation User Manual, available separately.

Function	Icon	Operation
List		Touch to go to the control menu (see Fig. 4/03)
New Route		Touch to go to the address input
Input		Touch to enter a full address Touch to enter a POI address Touch to navigate to a stored address

Traffic

This view presents you with information on road sections that are affected by traffic events. All the options and functions are given in more detail in the Navigation User Manual, available separately.

Function	Icon	Operation
No Report		No traffic announcements received (see Fig. 4/03 upper right corner)
Report not relevant		Touch to view received traffic announcements that are not on the active route (see Fig. 4/03 upper right corner)
Report relevant		Touch to view received traffic announcements that are on the active route (the approximate delay caused by the event is also displayed)

ℹ NOTE

The broadcast of traffic announcements depends on different factors. Using the TMC function requires a radio stations, which broadcasts TMC signals.

ABOUT THIS CHAPTER

This chapter describes all the parameter and setting functions of the ZENEC system. Please note that settings or changed parameters can have a direct influence on the everyday use of the ZENEC system.

In addition, all the equipment variants and functions of the ZENEC system are described, as well as optional equipment of the vehicle manufacturer that may not be included as standard in your vehicle. This section does not refer separately to such issues. Differences from this information, features or functions cannot be used for any claims.

SAFETY INSTRUCTIONS

> ⚠ **CAUTION**
>
> If the driver is distracted, this may cause an accident or injury.
> Operating the ZENEC system can distract attention from the general traffic situation! Equally, connecting, changing or inserting data media can distract the driver.

> ℹ **NOTE**
>
> All updates and bugfixes besides map material for navigation can be downloaded free of charge from www.zenec.com.

> ⚠ **CAUTION**
>
> If you are using a password to protect your ZENEC system, ensure that this password is kept safe for future access.
> There is a charge for unlocking the ZENEC system, which can only be done by ZENEC Service.

BEFORE USING FOR THE FIRST TIME

- ✓ Always follow all the safety instructions of the vehicle manufacturer, and the instructions given in this user manual.
- ✓ Please pay attention to the safety instructions.

CONTENTS OF THIS CHAPTER

RADIO CONFIGURATION
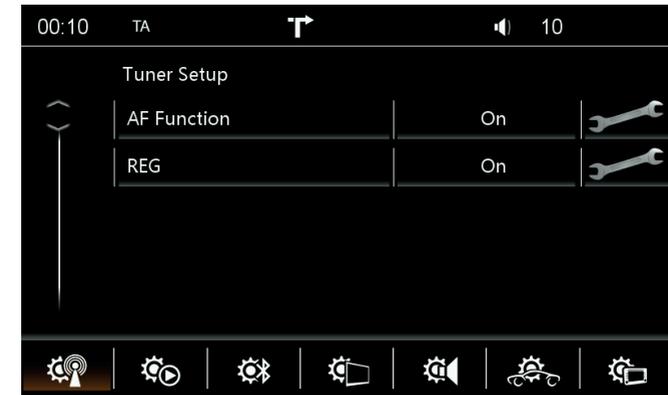

Here you can make the settings for operation of the radio. To make the settings press the appropriate wrench icon. You will find an explanation of the abbreviations at the end of this user manual.

Overview

Function	Icon	Operation
Tuner configuration		Touch to access this view

Function	Icon	Operation
AF		ON/OFF
REG		ON/OFF

MEDIA CONFIGURATION
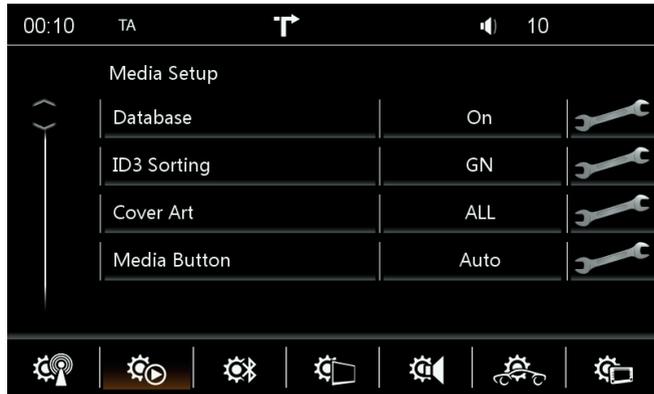

Fig. 5/04

Here you can make the settings for operation of the audio playback. To make the settings press the appropriate wrench icon. You will find an explanation of the abbreviations at the end of this user manual.

Overview

Function	Icon	Operation
Media configuration		Touch to access this view

Function	Icon	Operation
Database		ON = Gracenote support enabled OFF = Gracenote support disabled
ID3		GN = Gracenote sort ALL = User sort
Cover Art		GN = Gracenote sort ALL = User sort
Media Icon		Button assignment MEDIA (Auto/USB/SD/DVD/iPod)

ℹ **NOTE**

If none or not all the music titles of your external media are displayed, please set the ID3 and Cover settings to ALL.

BLUETOOTH CONFIGURATION
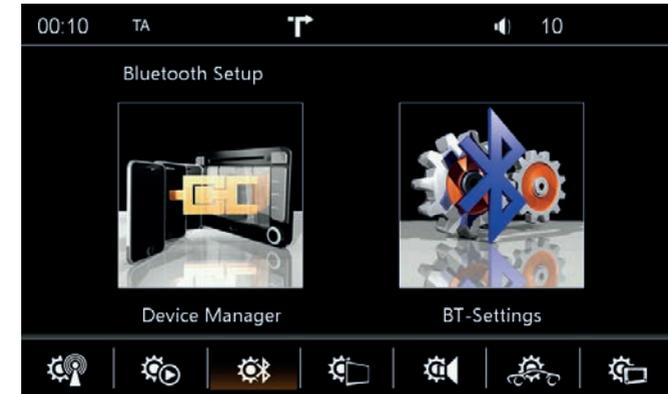

Fig. 5/05

Here you will find all the options for Bluetooth management and settings. A description is also given on how to pair and remove Bluetooth devices. You will find an explanation of the abbreviations at the end of this user manual.

Overview

Function	Icon	Operation
Bluetooth configuration		Touch to access this view

Function	Icon	Operation
Device Manager		Touch to pair, disconnect, or manage mobile devices Settings → BT Configuration → Devive Manager S. 70
BT Settings		Touch to change settings for BT operation Settings → BT Configuration → BT Settings S. 73

Device Manager

Fig. 5/06

The pairing process requires the BT function on the end device to be enabled. Please also take note of the instructions of the device manufacturer on the pairing of devices.

Function	Icon	Operation
Device Manager		Touch to access this view

Function	Icon	Operation
Search		Touch to search for a new Bluetooth device (not possible if two devices are connected)
Pair		Touch to reconnect a paired Bluetooth device
Disconnect		Touch to disconnect a paired Bluetooth device
Delete		Touch to delete a Bluetooth device from the list (requires the device to be disconnected)

Icon	Meaning
	This icon indicates that the paired Bluetooth device supports HSP/HFP, and can be used via the hands-free system. Hands-free System S. 49
	This icon indicates that the paired Bluetooth device supports A2DP, and can be used via the audio player. Settings → BT Configuration → BT Settings S. 73

Pairing

Fig. 5/07

Via the ZENEC system

Function	Icon	Operation
Search		Touch the magnifying glass to initiate a search for BT devices. From the list select the desired mobile device that you want to synchronize with the ZENEC system. After selecting follow the instruction of the ZENEC system.
Code		Standard Code*: 1 2 3 4

ⓘ NOTE

*For mobile devices that do not support the SSP standard.

Via the mobile device

Function	Icon	Operation
Search		Make sure that the ZENEC system is in Device Manager view otherwise the ZENEC system will not be visible to others. Follow the instructions of the device manufacturer on pairing.

Auto Connect

Once a mobile device has been connected with the ZENEC system, it will be automatically paired when the ZENEC system is started. On being briefly disconnected the ZENEC system will attempt to establish a new connection.

ⓘ NOTE

On pairing for the first time, be sure to permanently enable the connection confirmation on your mobile device, otherwise malfunctions may occur during the Auto Connect process.
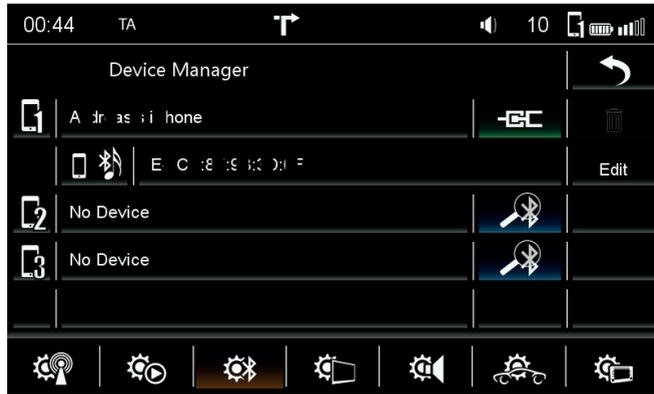

Device names

Fig. 5/08

Change the name of the mobile device displayed in your ZENEC system (e.g. "Mobile phone John Smith")

Function	Icon	Operation
Device name	Edit	1. Touch the name to be changed from the list. 2. Touch EDIT to open the keypad. Edit the name as you wish, and then save. This name is only changed in the ZENEC system: in the mobile phone the existing name is not changed.

ℹ **NOTE**

The original device name of the mobile device is not changed. The name you enter here is only displayed in the ZENEC system.

BT SETTINGS
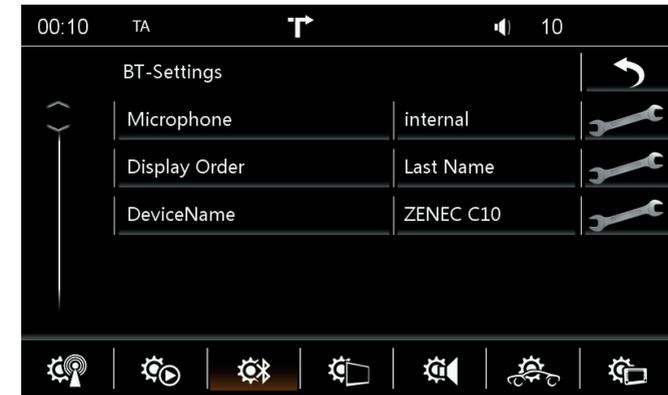

Fig. 5/09

Here you can make the settings for Bluetooth operation. To make the settings press the appropriate wrench icon.

Overview

Function	Icon	Operation
BT Settings		Touch to access this view

Microphone

Function	Icon	Operation
Microphone		Internal = inside device External = only if installed

Sort

Function	Icon	Operation
Name		1: by first name 2: by surname

Device name

Function	Icon	Operation
Nickname		Here you can rename the ZENEC system. The name you enter here is displayed on the mobile devices.

TFT CONFIGURATION

Fig. 5/10

Here you can make the settings for the display. To make the settings press the appropriate wrench icon.

Overview

Function	Icon	Operation
TFT Configuration		Touch to access this view

Function	Icon	Operation
TFT Settings		Touch to select the brightness control: Navi = Brightness setting Day/Night is controlled by the navigation system. Car = Brightness setting Day/Night is controlled by the vehicle.
TS Calibration	**OK**	Touch to recalibrate the TFT (follow the instructions on the screen).
TS Brightness Day		-10 < > +10
TS Brightness Night		-10 < > +10

ℹ **NOTE**

Using the DISP button you can set the display brightness to three levels
(↻ 100% → 50% → 0% ↺).

AUDIO CONFIGURATION

Fig. 5/11

In this menu you can make all the settings to do with audio output. Please remember that all the settings you make here will have a direct influence on the sound in your vehicle.

Overview

Function	Icon	Operation
Audio configuration		Touch to access this view

Function	Icon	Operation
Loudspeaker system		Touch to make general audio settings Settings → Audio Configuration → Loudspeakers S. 76
Audio setting		Touch to make audio DSP settings Settings → Audio Configuration/Audio Settings S. 79
Presets		Touch one of the presets to apply this profile Settings → Audio Configuration → Profile S. 84

LOUDSPEAKER SYSTEM
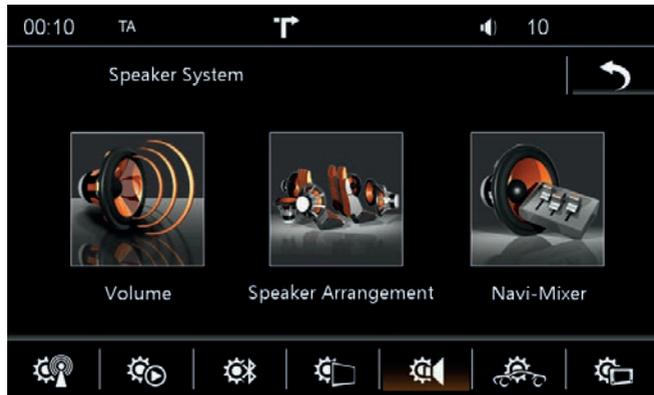

Fig. 5/12

Function	Icon	Operation
Loudspeaker system		Touch to access this view

Function	Icon	Operation
Volume		Touch to set initial and normal volume levels Loudspeaker System → Volume S. 77
Loudspeaker setup		Touch to make general loudspeaker system settings Loudspeaker System → Loudspeaker Setup S. 78
Navi mixer		Touch to set the navigation voice outputs Loudspeaker System → Navi-Mixer S. 78

Volume
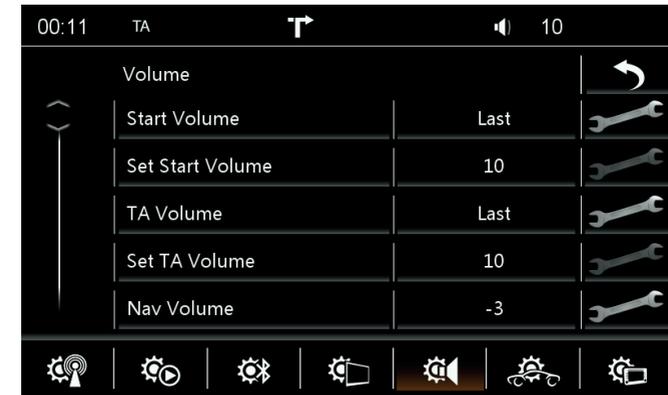

Fig. 5/13

In this menu you can adjust the normal volume of the sources.

Function	Icon	Operation
Initial Volume		Setting = manually adjusted volume Last = last volume set before switching off
Adjust Initial Volume		This setting can only be made if the upper setting is at SET. 0< >+40
TA volume		Setting = manually adjusted volume Last = last volume set
Adjust TA Volume		This setting can only be made if the upper setting is at SET. 0< >+40
Navigation Volume		-9< >+3
Tuner		-9< >+3
CD/DVD		-9< >+3
USB/iPod		-9< >+3
A/V In		-9< >+3
Camera Mic.		-9< >+3

Loudspeaker setup
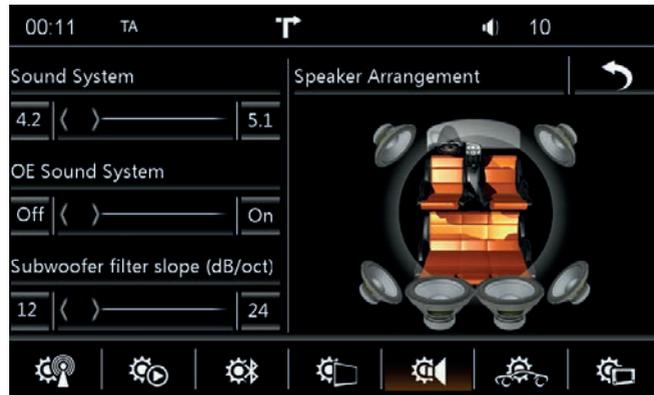

In this menu you can make the settings for the loudspeaker system. Please note that the settings you make here will have an affect on the sound. You can reset them at any time using the preset profile.

Function	Icon	Operation
Sound system		4.2 = 4 channel speaker system (+ 2 subwoofer) 5.1 = 5-channel speaker system (+ 1 subwoofer)
OE Sound system		On = Sound system installed by the vehicle manufacturer (DSP functions are partly disabled) Off = ZENEC DSP functions fully enabled
Subwoofer filter		12 dB filter 24 dB filter

Navi-Mixer
(no picture)

In this menu you can make the sound setting of the navigation output. Please note that other settings can be made in Setup in the navigation system .
Navigation User Manual → Settings

Function	Icon	Operation
Mute		ON = Voice output mutes media playback OFF = Volume of media playback reduced
Audio output		Driver = only at driver's speaker Front = only at speakers front left and right

AUDIO SETTINGS

Here you have the option of adjusting the sound profile optimally to your vehicle. The setting options described in this section for parametric equalizing, crossover setting, and time delay correction have great influence on the sound in your vehicle. To achieve an improvement in the acoustic playback by using the correct settings presumes a certain amount of background knowledge. If you do not have background knowledge about digital signal processors, gain settings, time delay differences, and Q-factors, you should perhaps avoid making settings yourself. Instead make use of the vehicle presets to quickly and easily find a suitable standard setting for your vehicle.

| Function	Icon	Operation	
Equalizer		Touch to set the 11-BAND equalizer Audio Settings → Equalizer	S. 80
X-Over		Touch to make settings for the crossover Audio Settings → X-Over	S. 81
Fader/ Balance		Touch to set fader or balance Audio Settings → Fader/Balance	S. 82
Time Delay Correction		Touch to make the time delay correction for individual speakers Audio Settings → Time Delay Correction	S. 83

Equalizer

In this menu you can make the settings for the playback frequency response.

Function	Icon	Operation
Shape factor Q	◁ ▷	Touch to set the quality of the filter for the chosen band (1= wide, 5 = narrow) 1 < > 5
Frequency	◁ ▷	Touch to set a filter frequency for the selected band (each band adjustable in 7 steps)
Gain	◁ ▷	-14 < > +2
Band	◁ ▷	Touch to select the desired BAND
Band	(touch icon)	Touch and hold to change the setting of the selected band

> ℹ **NOTE**
>
> The sound setting options are explained in a user manual included separately.
> Device Quick Start Guide → Basic Operation → Sound Setting

X-Over
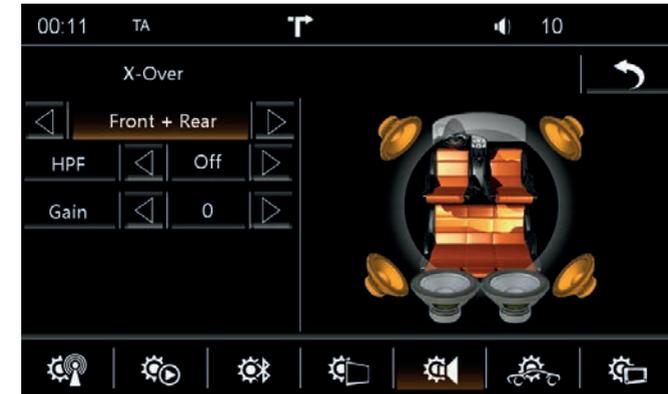

Fig. 5/17

In this menu you can make the settings for the crossover frequency of individual channel groups.

Function	Icon	Operation
Loudspeaker Group	◁ ▷	Selection of speaker group you want to set Front + Rear/Subwoofer/Center (5.1 setting only)
HPF	◁ ▷	Touch to set the high pass filter Off (FLAT)/63 Hz/80 Hz/100 Hz/125 Hz
LPF	◁ ▷	Touch to set the low pass filter Off (FLAT)/63 Hz/80 Hz/100 Hz/125 Hz
Gain	◁ ▷	Touch to set the GAIN of the selected loudspeaker group -6 < > 6
Phase	(slider)	SUBWOOFER ONLY 0/180°
ON/OFF	(slider)	SUBWOOFER ONLY ON = speaker as per setting OFF = mute

Balance/Fader

Fig. 5/18

In this menu you can make the settings for the balance between the speakers in the vehicle.

Function	Icon	Operation
Left/Right	◁ ▷	6L > < 0 > < 6R
Front/Rear	◁ ▷	6F > < 0 > < 6H
Crosshair	─┼─	Touch at the desired position

Time Delay Correction
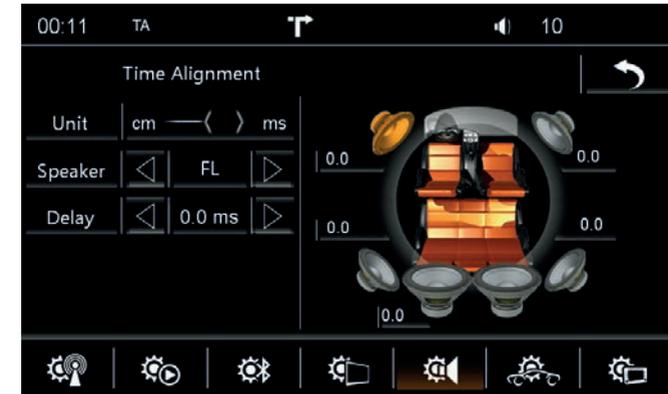

Fig. 5/19

In this menu you can set the time delay correction for the loudspeakers in your vehicle.

Function	Icon	Operation
Unit	◁ ▷	Selection of desired unit ms = time cm = distance
Speaker	◁ ▷	Touch to select the desired speaker (FL/FR/HL/HR/SUBW/CNTR)
Delay	◁ ▷	ms = 0.0 < > 8.9 ,0.1 ms steps cm = 0 < > 305 ,ca. 3 cm steps

The distance between the ears and the speaker system installed in the vehicle varies considerably due to the complex arrangement of the individual speakers. This menu gives you the option to delay the audio signal at each of the speakers so that you have a central auditory sensation.
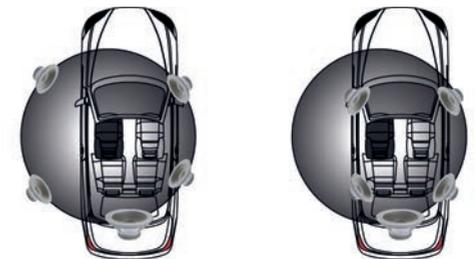

PROFILES

Presets
The six preset profiles offers you a quick and easy way of tuning the sound to your vehicle.

Function	Operation
Profiles	Touch to select one of the profiles User/Flat/Subcompact/Compact/Sedan/Station Wagon/Van SUV/Convertible

Profile	Description
	User If you alter the values of the sound settings the system switches to the profile User.
	Flat This centers all the settings back to a neutral position.
	Subcompact Use this setting, if you drive a subcompact car.
	Compact Use this setting, if you drive a compact car.
	Sedan Use this setting, if you drive a vehicle with a notchback.
	Station Wagon Use this setting, if you drive a vehicle with an open trunk in the passenger compartment.
	Convertible Use this setting, if you drive a vehicle with an open roof.
	VAN/SUV Use this setting, if you drive a vehicle with three rows of seats (VAN) or a large interior (SUV).

ABBREVIATIONS

Abbreviation	Description
A/V-IN	Input option for audio/video signal sources (serial input)
A2DP	Manufacturer-independent Bluetooth® technology allowing audio signals to be transmitted (Advanced Audio Distribution Profile)
AC-Control	Visual status information about the air conditioner
AM	Transmission standard for terrestrial reception of medium wave analog radio (MW)
AUX	Input option for any audio signal source (Auxiliary Input)
CAN/Stalk	Specific communications adapter for connection to a CAN bus using an IF interface
CAN-Bus	The CAN bus (Controller Area Network) is a serial bus system for the communication of control units in a vehicle
DAB / DAB+	Transmission standard for terrestrial reception of digital radio (Digital Audio Broadcasting)
DSP	The digital signal processor is used for the processing of digital signals (e.g. audio or video signals)
DVB-T	Transmission standard for terrestrial reception of digital video (Digital Video Broadcasting)
DVD	Digital Video Disc
EQ	Equalizer
FAT32	Formatting format for digital media (File allocation table 32-bit)
FM	Transmission standard for terrestrial reception of very high frequency analog radio (UKW)
GPS	Global navigation satellite system for position fixing (Global Positioning System)
GSM	Global mobile radio network standard for fully digital mobile radio networks (Global System for Mobile Communications)
ID3-Tag	ID3 tags mean meta data, which could be included together with the MP3 format.
MFL	Multifunction steering wheel
microSD	Compact flash memory
MLT	"More Like This" is a Gracenote function

Mood	Playlist generated based on the mood you want to create (100 mood styles)
M-Zone	Interface for a rear seat infotainment system (Rear seat entertainment)
OPS	Visual and acoustic parking system
P.O.I.	POIs are geo-objects that have significance in the navigation system. For example: places to eat, places to stay, filling stations, cash machines, and parking blocks
REG	Regional station
RFK	Rear-view camera
SSP	Secure Simple Pairing (for Bluetooth devices)
TMC/TMC Pro	Reception of messages about disruptions to traffic in digital form. Modern navigation systems can process TMC to generate detour routes around traffic tie-ups and obstructions (dynamic route guidance).
USB	A USB connection is a serial bus system for connecting a device to other devices (Universal Serial Bus).
XVID	XVID is the most popular container format. Over 90% of present-day AVI files are encoded with Xvid.

INDEX

Gracenote®-End User License Agreement

This application or device contains software from Gracenote, Inc. of Emeryville, California ("Gracenote"). The software from Gracenote (the "Gracenote Software") enables this application to perform disc and/or file identification and obtain music-related information, including name, artist, track, and title information ("Gracenote Data") from online servers or embedded databases (collectively, "Gracenote Servers") and to perform other functions. You may use Gracenote Data only by means of the intended End-User functions of this application or device.

You agree that you will use Gracenote Data, the Gracenote Software, and Gracenote Servers for your own personal non-commercial use only. You agree not to assign, copy, transfer or transmit the Gracenote Software or any Gracenote Data to any third party. YOU AGREE NOT TO USE OR EXPLOIT GRACENOTE DATA, THE GRACENOTE SOFTWARE, OR GRACENOTE SERVERS, EXCEPT AS EXPRESSLY PERMITTED HEREIN.

You agree that your non-exclusive license to use the Gracenote Data, the Gracenote Software, and Gracenote Servers will terminate if you violate these restrictions. If your license terminates, you agree to cease any and all use of the Gracenote Data, the Gracenote Software, and Gracenote Servers. Gracenote reserves all rights in Gracenote Data, the Gracenote Software, and the Gracenote Servers, including all ownership rights. Under no circumstances will Gracenote become liable for any payment to you for any information that you provide. You agree that Gracenote, Inc. may enforce its rights under this Agreement against you directly in its own name.

The Gracenote service uses a unique identifier to track queries for statistical purposes. The purpose of a randomly assigned numeric identifier is to allow the Gracenote service to count queries without knowing anything about who you are. For more information, see the web page for the Gracenote Privacy Policy for the Gracenote service.

The Gracenote Software and each item of Gracenote Data are licensed to you "AS IS." Gracenote makes no representations or warranties, express or implied, regarding the accuracy of any Gracenote Data from in the Gracenote Servers. Gracenote reserves the right to delete data from the Gracenote Servers or to change data categories for any cause that Gracenote deems sufficient. No warranty is made that the Gracenote Software or Gracenote Servers are error-free or that functioning of Gracenote Software or Gracenote Servers will be uninterrupted. Gracenote is not obligated to provide you with new enhanced or additional data types or categories that Gracenote may provide in the future and is free to discontinue its services at any time.

GRACENOTE DISCLAIMS ALL WARRANTIES EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT. GRACENOTE DOES NOT WARRANT THE RESULTS THAT WILL BE OBTAINED BY YOUR USE OF THE GRACENOTE SOFTWARE OR ANY GRACENOTE SERVER. IN NO CASE WILL GRACENOTE BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES OR FOR ANY LOST PROFITS OR LOST REVENUES.

STATUTORY RIGHTS AND WARRANTY

Dear customer,

Please read the warranty specifications below carefully.
Should your ZENEC product require warranty service, please return it to the retailer from whom it was purchased or the distributor of your country. Do not send any product to ZENEC directly.

This ZENEC product is protected against defective materials and/or improper workmanship by a factory warranty, for the period of two years from date of purchase at retail, to the original buyer.

For warranty work to be carried out, an RMA number must be generated, which requires a valid product serial number and the original sales slip.

Guarantee Restrictions

This warranty does not cover any damage due to:

1. Unauthorized or unapproved installation, incorrect audio or mains connection(s).
2. Defects caused by exposure of product to humidity, water and organic fluids, prolonged exposure to sun rays or excessive dirt or dust.
3. Mechanical defects caused by accidents, fall or impact.
4. Unauthorized repair attempts and modifications of product not explicitly authorized by the manufacturer.

This warranty is limited to the repair or the replacement of the defective product at the manufacturer's option and does not include any other form of damage, whether incidental, consequential or otherwise. The warranty does not cover any transport costs or damages caused by transport or shipment of the product. Any additional or further claims and requirements for compensation of auxiliary components that have been damaged in sequence, directly or indirectly, are strictly excluded.

Hereby, ACR Brändli + Vögeli AG declares that the type of radio equipment Z-E2026 / Z-E4626 complies with the 2014/53/EU Directive. The full text of the EU Declaration of Conformity is available at the following Internet address: http://www.zenec.com (see link "Product Conformity Documents" in the footer area of the page).
