

Current status of the map material and software version (fig. similar)

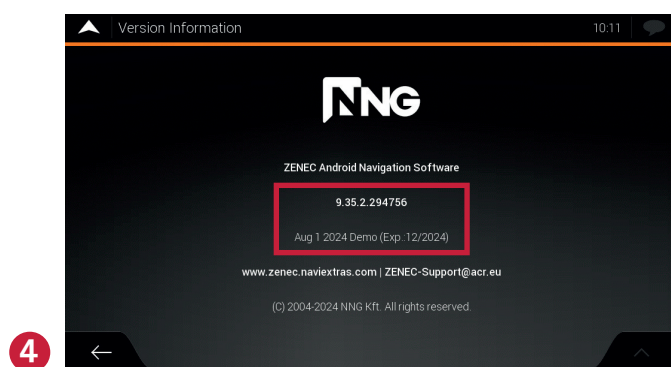

In the main GUI, go to the settings at the bottom right.

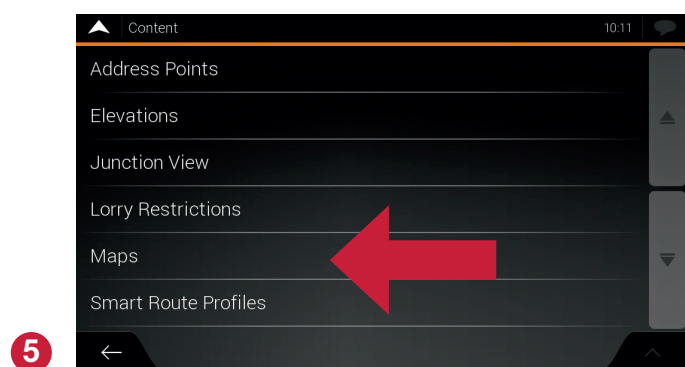

Then select "About this software".

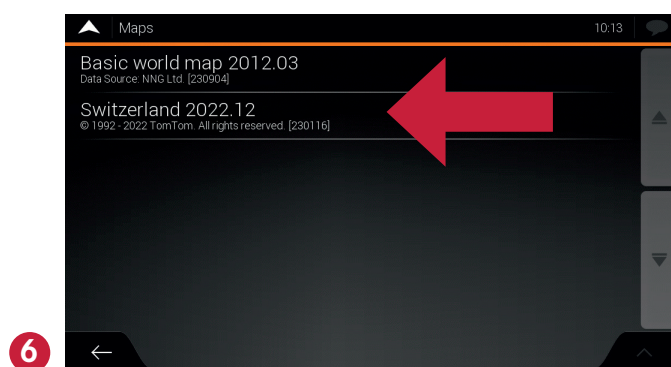

Then select "Version Information" or "Content".

The version number of the software is displayed. The specified date refers only to the development of the software and not to the status of the map material.

Select the "Maps" option under "Content".

Here you will find information on the current status of the map material for each country.

ZENEC NAV MAPS UPDATE

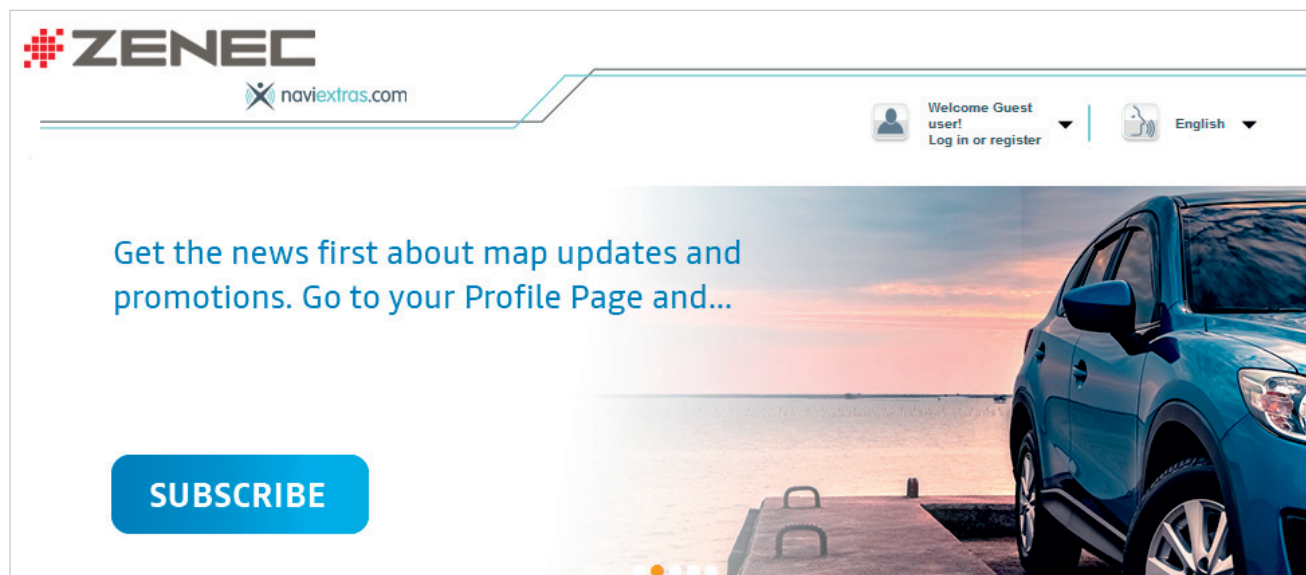

Z-EMAP76-MH

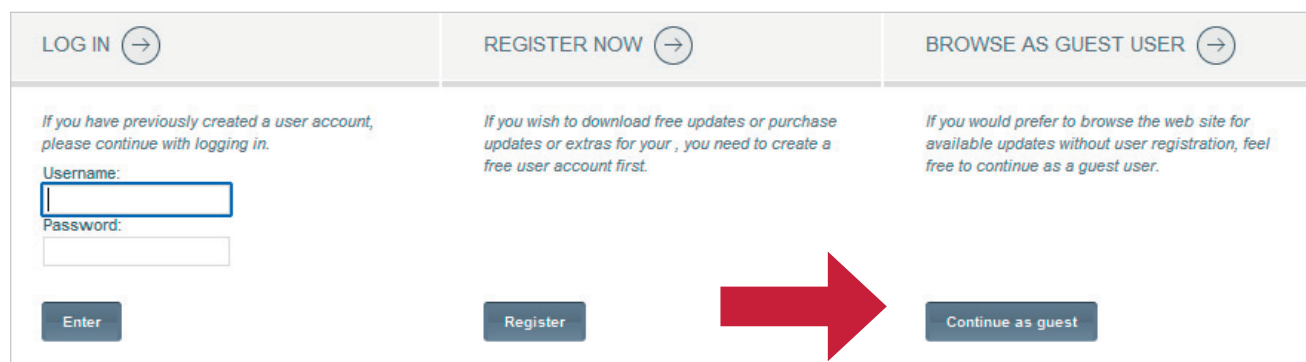

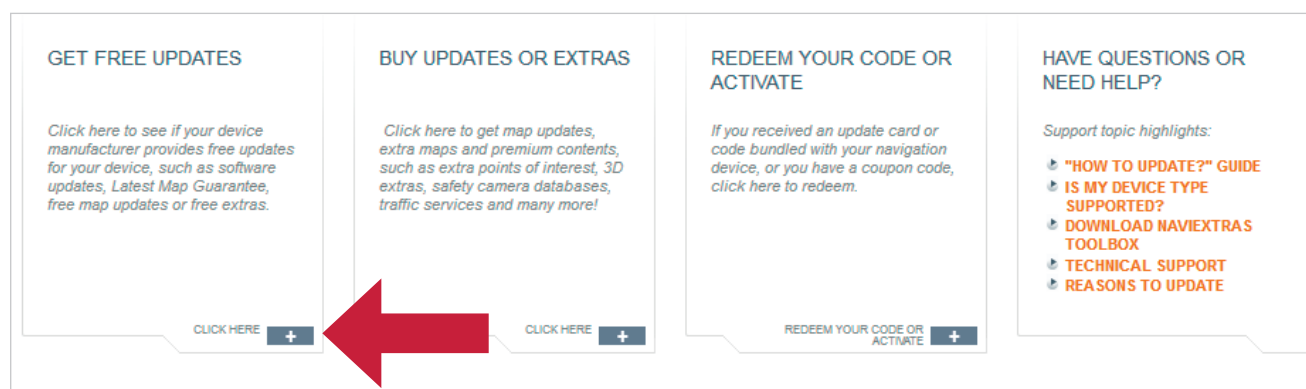

Switch off the naviceiver before removing the microSD card from the device and inserting it into the SD card adapter supplied.

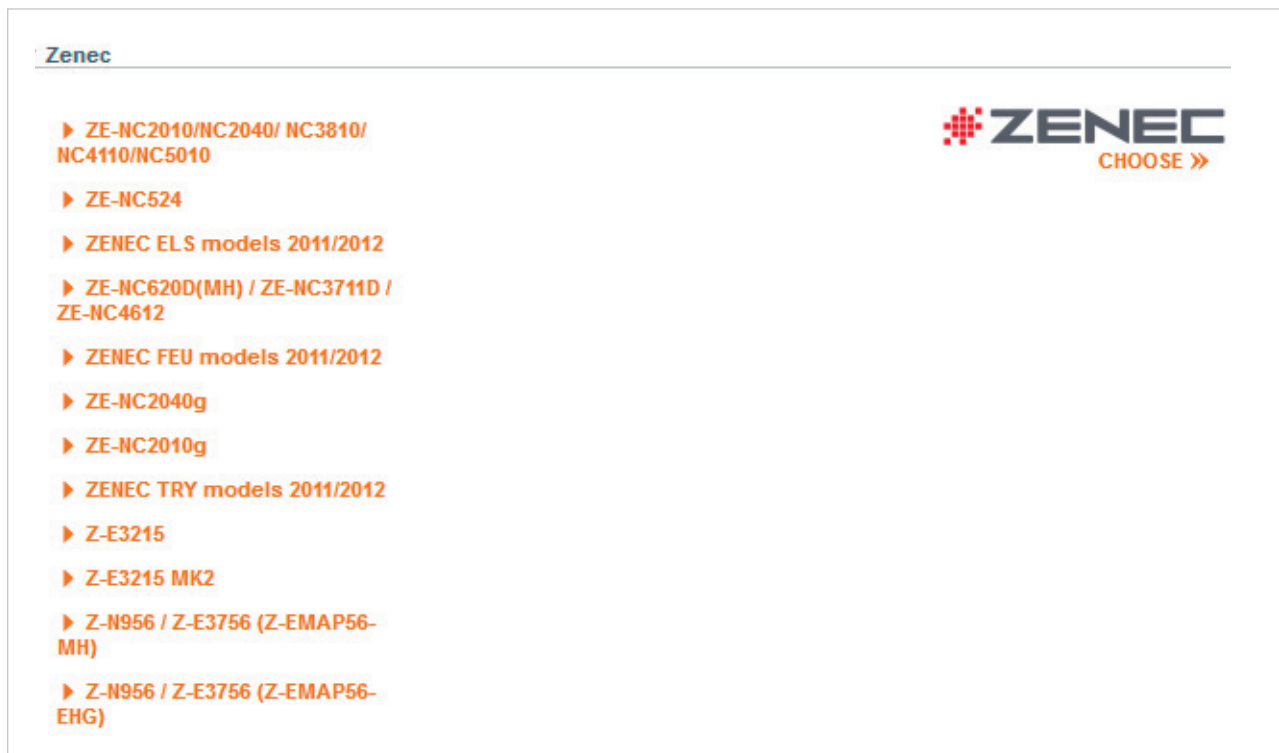

Go to <https://zenec.naviextras.com/shop/portal/newLogin?live.ui.locale.code=en> on the internet.

Register on the website to create a user account. Alternatively, you can continue as a guest. To do this, click on “GET FREE UPDATES” at the bottom left and then select the “Continue as a guest” option on the right-hand side of the following page.

Click on your device model or the appropriate navigation map.

The list of free contents is available after registering your device with the Naviextras Toolbox.
If you have not installed the Naviextras Toolbox yet, please download it from [here](#).

ZENEC NAV MAPS UPDATE

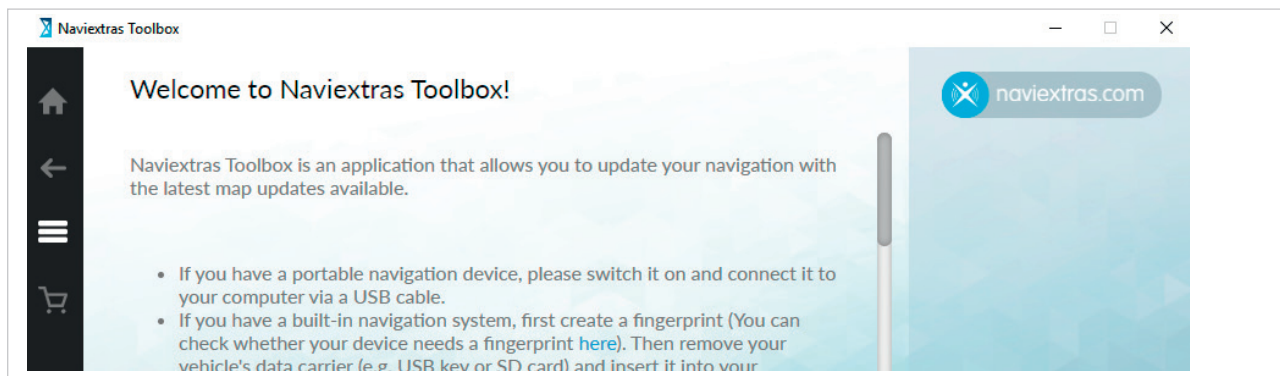

Z-EMAP76-MH

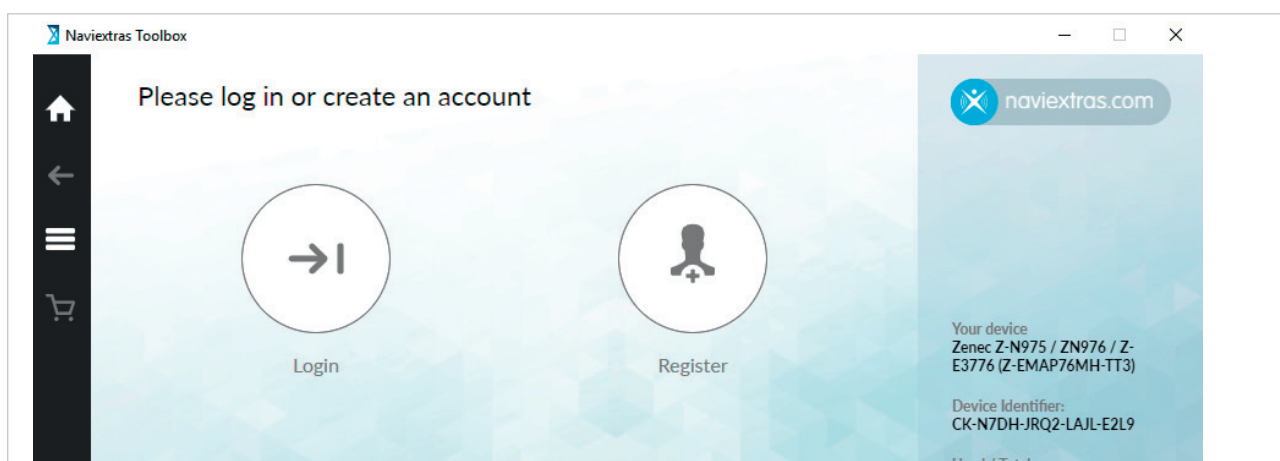

Now download the Toolbox software from Naviextras. The Toolbox is a free Windows utility program. To do this, tap on “DOWNLOAD”. Supported platforms: • Windows 8 • Windows 10

After successful download, open the file “**NNaviextras-Toolbox-inst.exe**” and follow the installation instructions. After successful installation, start the toolbox.

Now insert the SD card into the computer's card reader. The Toolbox then checks the content of the SD card. Please log in with your existing Naviextras account or register.

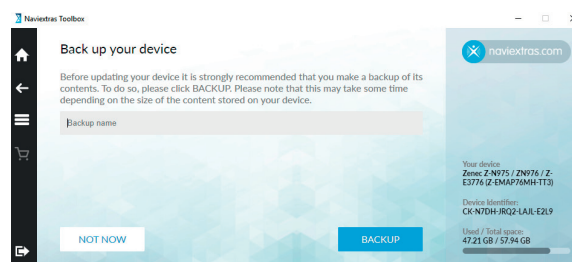

ZENEC NAV MAPS UPDATE

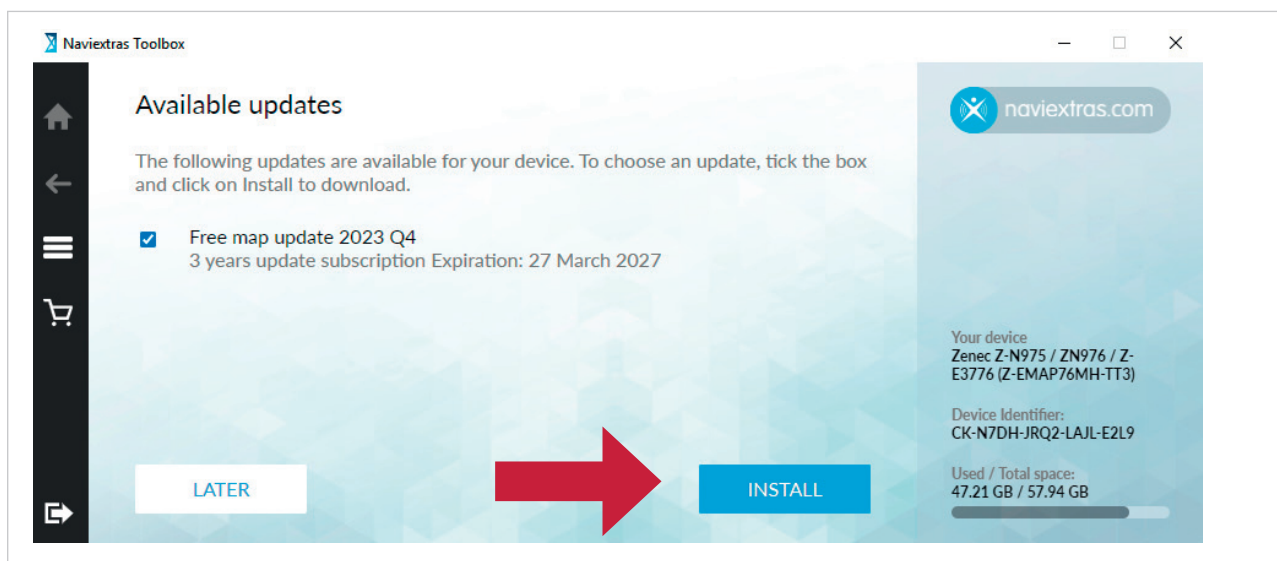

Z-EMAP76-MH

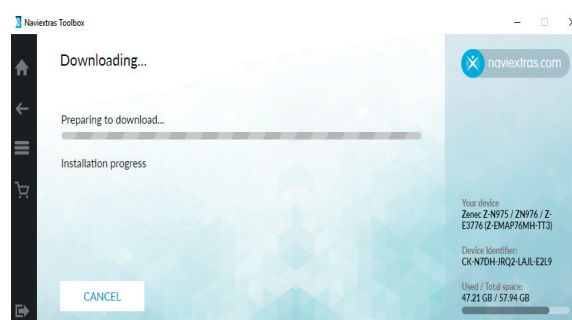

You will then be taken directly to the backup copy prompt. Please make sure you create this, as this is the only way to restore the card in the event of a problem during the update process.

Now select "Install".

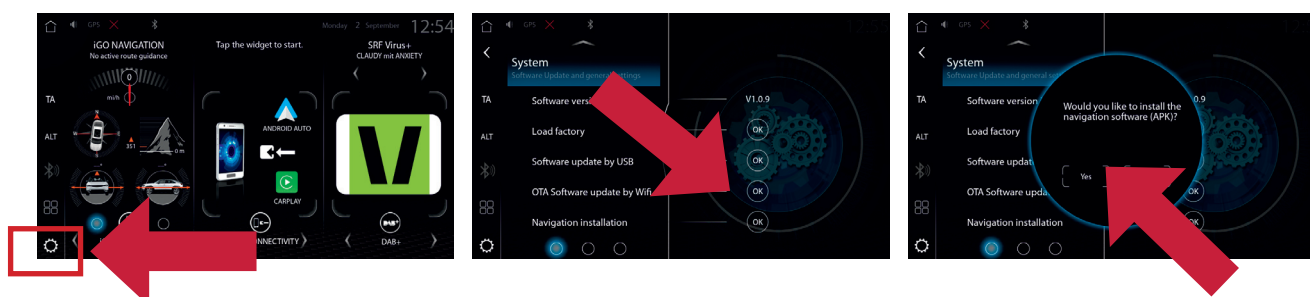

The update will now be installed. After a successful download, the microSD card can be reinserted into the sat nav and the device can be started.

Now update your sat nav with the updated version.

To do this, go to "SETUP".

Then go to "Navigation Installation" and confirm this.

The updated sat nav data will now be automatically downloaded to your sat nav. You can then use your sat nav as usual.
